Genre Spotlight: MYSTERY

Mystery is a genre of fiction in which a detective, either an amateur or a professional, solves a crime or a series of crimes, relying on logic. The detective can be anyone from a private investigator, a police officer, an elderly widow, or a young person, but he or she generally has nothing material to gain from solving the crime. Subgenres include the cozy and the hard-boiled detective story.

Mystery novels are satisfying as one knows everything will be resolved in the end.
